

DESCRIPTION

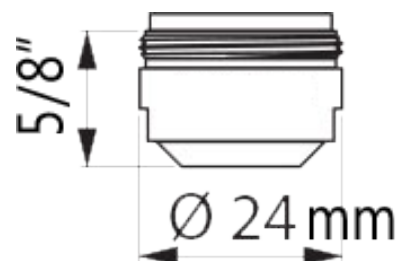

- Allows for a laminar flow, without any grid or partition touching the water.
- M24/100
- No standing water is possible in the interior parts of the nozzle.
- Inside made from Hostaform. Helps reduce the formation of lime scale.
- Only to be installed on faucets that have a flow control other than the nozzle or aerator.
- Outside made in chromed brass.

ADVANTAGES

- 
 Helps prevent the growth of bacteria
- 
 Fast installation, without tools and without cutting off water

TECHNICAL CHARACTERISTICS

Thread	M24/100
